

Have you already gained first-hand experience in the industrial assembling of small parts? We are looking for a production employee for our team in Munich who will support us with the assembly of nano-technological products.

Production employee (m/w) Positioning systems

Your responsibilities and tasks

- The assembly of nano-technological high-end products
- Justage of electronic components
- Functional testing and quality control of the manufactured products
- Analysis and documentation of test results
- Installation of production facilities for our systems and products

Your skills and qualifications

- A completed training as a precision engineer, dental technician, clockmaker, goldsmith or similar
- Professional experience in assembling small components
- Very good fine motor skills and a high amount of precision
- Good PC-skills
- A quality-conscious and reliable way of working as well as a high willingness to learn

What we do offer

- A permanent employment in Munich with attractive social benefits such as pension allowance and a performance-based bonus as well as numerous team events
- A diversified and challenging field of responsibility, the opportunity to bring in your own ideas as well as an excellent work atmosphere
- Lot of independence and individual responsibility within a high professional team
- Career opportunities within a technologically challenging, international high-tech environment

If you are interested in innovative technologies and you do think you can enrich our team with the relevant skills, we are looking forward to your application. Please send us a cover letter including your salary expectations along with your complete CV and copies of your degrees addressed to:
