Are you interested in business topics such as product life cycles, market and competitive analyses as well as in the (further) development of high-tech products? Then this working student job might be just right for you. We are looking for a

Working Student (m/f) Product Management

After an individually tailored training period, you will support our product managers in the following tasks.

Your responsibilities

- Implementation of market and competitive analyses plus requirements acquisition
- Support in the further development of the product and service portfolio of cryostats and microscopes
- Preparation of presentations for product strategy and strategic portfolio planning
- Collaboration in the implementation and planning of marketing activities
- Cost analysis and further development of a pricing strategy
- Interdepartmental information acquisition and coordination

Your skills

- Enrolled student of physics (or similar), ideally already in the Master's program
- Experimental background and basic knowledge in current research topics in quantum optics, transport measurements and/or scanning probe microscopy would be an advantage
- High affinity for technology and great interest in economic contexts & market research
- Abstract, strategic and interdisciplinary thinking
- Good MS Office knowledge and communication skills in German and English
- An independent and structured way of working as well as a quick comprehension

Our offer

- An exciting job which can be easily adapted to your class schedule
- The opportunity to gain insights into different departments and to further your personal development
- The possibility to take on smaller projects independently
- A great working atmosphere and an open corporate culture in our office in the heart of Munich/ from July/August 2018 on in our new building in Haar

You are interested in getting to know the Product Management department of an innovative and constantly growing company? In getting an impression of what your professional life could look like after your studies? You would like to work 16-20 hours per week on a two-three days schedule of your choice?

If so, we look forward to receiving your application by using our [Online Application Form](#).
